

# Vertex Rubber Private Limited

Leading manufacturer, supplier, and exporter of precision rubber parts and O-rings from Mumbai, India

# Who We Are

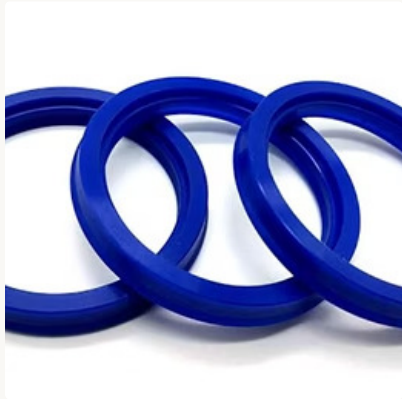

Vertex Rubber Private Limited is a specialized rubber parts manufacturer based in Mumbai, India. We export and supply all kinds of rubber parts and products tailored to diverse industrial requirements.

Our products are recognized for their sturdiness, dimensional exactness, elasticity, and abrasion safety. We have a dedicated team of industrial experts committed to meeting company targets.

# Our Comprehensive Product Range

With high creativity and advanced output methods, we maintain powerful setups that persistently help us achieve quality standards. We observe every aspect of our production unit to meet manufacturing targets.

## P U Seal

High-performance polyurethane seals for industrial applications

## Rubber Bellows

Flexible protective covers for mechanical systems

## Rubber Bushes

Vibration dampening components for various industries

# Sealing Solutions

## Rubber Cup Seals

Precision-engineered seals for hydraulic and pneumatic systems

## Silicone Ring

High-temperature resistant rings for demanding applications

## Silicone Seal

Durable sealing solutions for extreme conditions

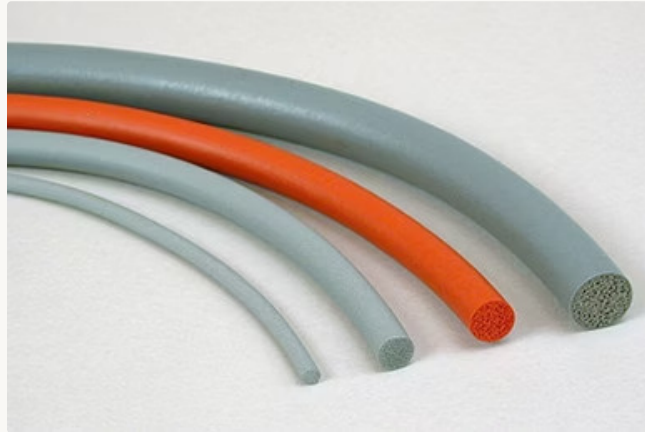

# Specialized Components

Rubber Diaphragms

Flexible membranes for pressure regulation and fluid control

Rubber Extruded Cord

Custom extruded profiles for sealing applications

Extruded Rubber Gaskets

Continuous profile gaskets for various industries

# Automotive & Industrial Solutions

## Automobile Rubber Bush

Specialized bushings for automotive suspension and mounting systems

## Butterfly Valve Rubber Sleeve

High-performance sleeves for valve applications

## Industrial Rubber Bushes

Heavy-duty bushings for industrial machinery

# Advanced Manufacturing Products

## Metal Bonded Rubber Mountings

Engineered mountings combining metal and rubber for superior vibration isolation and load-bearing capabilities

## Molded Rubber Products

Custom-molded rubber components designed to meet specific industrial requirements and applications

# World-Class Infrastructure

Our infrastructure is divided into specialized units working in close coordination to meet quality and quantity standards.

## Manufacturing Unit

State-of-the-art facilities with pressure trim press and mixing plant

## R&D Unit

Innovation center for product development and testing

## Quality Assessment Unit

Rigorous testing to ensure dimensional accuracy and durability

## Warehousing & Packaging

Efficient storage and secure packaging for global distribution

# Our Commitment to Quality

## Sturdiness

Products built to withstand demanding industrial conditions

## Dimensional Exactness

Precision manufacturing for perfect fit and function

## Elasticity

Superior flexibility and resilience in all applications

## Abrasion Safety

Enhanced durability and extended product lifespan

**SILICONE GASKET**

Vertex Rubber provides extreme quality range of silicone gaskets that are widely used in diverse industrial application.

- High Strength
- Accurate Dimension
- Long Usable Life
- Superior Quality
